

## Engineering & Project Manager

### The Job

The primary function of this job is to manage our small Technical Team and its activities. You will take responsibility for equipment assembly and integrations (including our *archytas series* – [www.intertronics.co.uk/archytas](http://www.intertronics.co.uk/archytas)), equipment installations at customer sites, repairs and servicing, our Technology Centre, and customer material and equipment trials. This role involves project and people management, quality and H&S, and budgets and costing; but is also very much a hands-on role. The Technical Team is a support function to the commercial activities of the company.

### About Us

We are a distributor of adhesives and protective materials, and the requisite application and curing equipment, to technology manufacturing companies in the UK and Ireland, including leading edge companies in electronics, medical devices, aerospace, F1 and automotive.

As a supplier to companies on the cutting edge of technology manufacturing, we help bring innovations to life that will change the world. We are incurably curious, and thrive on helping our customers find ways to put things together effectively, improve their productivity, and achieve strong return on investment. It's exciting and rewarding. No two days are the same.

Find out what it's like to work with us: [www.intertronics.co.uk/working-for-intertronics/](http://www.intertronics.co.uk/working-for-intertronics/)

### What We Need

- Five years minimum in a practical engineering role, preferably in a technical manufacturing environment
- Project management experience
- CAD knowledge required (we use Solidworks)
- Knowledge of electronics, soldering, pneumatics, 3D printing desirable
- Experience of adhesives, coatings, dispensing, robotics or curing is desired but not a requirement
- Organised and process driven
- Detailed and a creative problem solver
- Effective written and oral communication skills
- Credibility and reliability – make realistic commitments and live up to them. Meet deadlines
- Commitment to our Vision and Values

### What We Offer

- Smart, modern working conditions in our Kidlington head office
- Flexible working
- 37.5 hours per week, Monday to Friday
- 23 days holiday per year and your birthday off
- Bonus paid monthly based on hitting sales goals
- A clear set of objectives with learning and development goals

You are invited to come and meet us and to look around the business. Give me a call or drop me an e-mail. Applications including CVs to:

Teresa Nee, Chief Operations Officer
